SUMMARY

Freelance full-stack developer since 2025. I build custom systems for businesses: an accounting system holding ~286,000 records across five companies, a multi-tenant SaaS platform for personal trainers, and management apps that replace spreadsheets. My strength is systems built around business data, and I'm now adding AI to my products: I built a first function-calling assistant for Korex and I'm currently developing an agent that helps trainers create workout programs.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL
Frontend: React, Next.js, Tailwind CSS, Zustand, React Query, HTML, CSS
Mobile: React Native, Expo
Backend & Integrations: Node.js, Express, FastAPI, REST APIs, JWT, Zod, Firebase Authentication
Databases & ORMs: PostgreSQL, MySQL, MongoDB, Firestore, Prisma
Tools: Git, GitHub, GitHub Actions, Postman
Methodologies: Scrum, UML
AI Used in Projects: Gemini API (function calling), Claude Code, OpenCode
Currently Learning: RAG, MCP, AI agents

EXPERIENCE

Freelance Full-Stack Developer — Feb. 2025 – Present

Remote

I build custom web applications end to end, from client discovery to deployment. Clients include a construction and real estate group, personal trainers, a condominium management firm, and local businesses in Tucumán.

Korex – SaaS Platform for Personal Trainers — Apr. 2026 – Present

- Built a multi-tenant platform with per-trainer data isolation covering clients, plans, subscriptions, workout programs, and fee tracking with payment statuses (pending, paid, overdue).
- Delivered De la Rosa App to a trainer who manages 40–60 clients, with his own branding and onboarding, running as just another tenant with no code fork or separate infrastructure.
- Developed a first version of the AI assistant as a Telegram bot using Gemini 2.5 Flash with function calling: read queries ran immediately, while write actions required confirmation. I retired it to bring the assistant into the app, where I'm now building an agent that helps trainers create workout programs.
- Implemented the client mobile app in Expo (set logging, RPE, rest timer); not yet published.

Technologies: React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Zod, Expo, Gemini API

ReporteApp – Multi-Company Accounting System — Mar. 2026 – Present

Construction and real estate group

- Built a system that centralizes the upload, validation, and reconciliation of ~286,000 accounting records across five companies. It feeds the reports the group relies on for decision-making: balance sheet, income statement, and project-level cash flow.
- Traced opening-balance discrepancies between two versions of the General Ledger to five root causes and rebuilt the ledger from corrected source data.
- Implemented a validator that blocks unbalanced entries, invalid accounts, and missing cost centers, along with incremental General Ledger calculations and on-demand sync with external databases.

Technologies: Python, FastAPI, PostgreSQL, Streamlit, Power BI, GitHub Actions, Render

ConsorcioApp – Condominium Management **Oct. – Dec. 2025**

Client: condominium management firm

- Built an app to manage buildings, units, monthly statements, and payments from a single dashboard.
- Automated maintenance fee calculations, late fees, and discounts, with PDF receipts and outstanding-balance reports.

Technologies: Next.js, React, TypeScript, Tailwind CSS, Prisma, PDFKit

ADDITIONAL CLIENT WORK

ChapulinaApp – Inventory Management **Oct. – Nov. 2025**

Size-based inventory, low-stock alerts, and pricing controls for a clothing boutique. React, Node.js, Express, and MongoDB.

Oliva.Tuc – Landing Page **Aug. 2025**

Responsive product catalog with a cart and WhatsApp ordering for an olive oil brand. Next.js, TypeScript, and Tailwind CSS.

Alenort – Management System **Feb. – Apr. 2025**

Sales, inventory, and order management with authentication and role-based permissions. Next.js and Firebase.

EDUCATION

Associate Degree in Programming (Tecnicatura en Programación)
National Technological University (UTN FRT), San Miguel de Tucumán — 2023 – May 2025
Completed

Information Systems Engineering
National Technological University (UTN FRT) — 2020 – 2022
On hold since 2022

AI TRAINING

Associate AI Engineer for Developers — DataCamp — in progress

Curso de Desarrollo con IA: el Nuevo Programador (AI-assisted development course, Oct. 2026, certificate) — MoureDev · BIG school

AI Agents for Beginners — Microsoft

LANGUAGES

Spanish: Native · English: Upper-intermediate (B2)
