PROFESSIONAL SUMMARY

I'm a freelance full-stack developer currently shifting my focus toward AI engineering. I build multi-tenant SaaS platforms and APIs, but what really drives my workflow right now is using AI agents (like Claude Code, Codex, and OpenCode) to ship code faster—from the first idea to deployment. I learn by building, and right now I'm deep diving into LLMs, RAG, and agentic workflows on my own.

TECHNICAL SKILLS

Programming languages: TypeScript, JavaScript, Python, SQL
Frontend: React, Next.js, HTML, CSS, Tailwind CSS
Backend & integrations: Node.js, Express, FastAPI, REST APIs, JWT, Firebase Authentication, Zod
Databases & ORM: PostgreSQL, MySQL, MongoDB, Firestore, Prisma
Tools: Git, GitHub, GitHub Actions, Postman, Thunder Client
Methodologies & modeling: Scrum, UML
Additional knowledge: C#, .NET, SQL Server, PHP, WordPress
AI & Agentic Tools: OpenCode, Claude Code, Model Context Protocol (MCP), RAG, Prompt Engineering, AI Agents, OpenAI API, LLMs

EXPERIENCE & SELECTED PROJECTS

Freelance Full-Stack Developer
Feb. 2025 – present

San Miguel de Tucumán, Argentina (remote)

Develop custom web applications for clients, from requirements discovery and architecture to full-stack development and deployment.

- I rely on AI coding tools like Claude Code and OpenCode daily to speed up how I write features, test them, and structure the architecture.

Korex – SaaS platform for personal trainers
Apr. 2026 – present

- Develop a multi-tenant platform with trainer-level data isolation, client management, workout plans, subscriptions, and payment tracking.
- Built a Telegram AI assistant for the platform using function calling and strict system prompts. It hooks directly into the backend to manage trainer-client interactions, alongside automated emails and push notifications.
- Delivered De la Rosa App to client Franco De la Rosa on the shared platform, with custom branding and onboarding, without duplicating code or infrastructure.

Technologies: React, TypeScript, Node.js, Express, PostgreSQL, Prisma, JWT, Google GenAI

ReporteApp – Multi-company accounting system
Mar. 2026 – present

Corporate group (construction and real estate)

- Develop an accounting system for a construction and real estate group operating five companies, with a REST API exposing 44 Swagger-documented endpoints.
- Automate journal-entry validation and reconciliation across systems, detecting unbalanced entries, invalid accounts, and missing cost centers.
- Implement incremental General Ledger calculations, synchronization with external databases, and automatic Power BI dashboard updates.

Technologies: Python, FastAPI, PostgreSQL, Streamlit, Power BI API, GitHub Actions, Render

ConsorcioApp – Multi-building management **Oct. – Dec. 2025**

ConsorcioApp

- Built an application to manage buildings, units, monthly settlements, and payment tracking from a single dashboard.
- Automated expense calculations, late fees, and discounts, with PDF receipts and outstanding-debt reports.

Technologies: Next.js, React, TypeScript, Tailwind CSS, Prisma, PDFKit

ADDITIONAL CLIENT PROJECTS

ChapulinaApp – Stock Management Web App **Oct. – Nov. 2025**

Size-based inventory, stock alerts, and pricing controls for a boutique. React, Node.js, Express, and MongoDB.

Landing Page – Oliva.Tuc **Aug. 2025**

Responsive catalog with a shopping cart and WhatsApp ordering. Next.js, TypeScript, and Tailwind CSS.

Management System – Alenort **Feb. – Apr. 2025**

Sales, inventory, and order management with authentication and role-based access. Next.js and Firebase.

EDUCATION

Technical Degree in Programming
UTN FRT – San Miguel de Tucumán — 2023 – May 2025
Graduated

Information Systems Engineering
UTN FRT – San Miguel de Tucumán — 2020 – 2022
Studies on hold since 2022

COURSES & CERTIFICATIONS

Introduction to AI-Assisted Development – El Nuevo Programador — BIG school · mouredev

Certificate of attendance · 4 hours · October 5, 2026

AI Engineering & Agentic Development (Self-Taught)

AI Engineering for Programmers — DataCamp

Currently enrolled

Agentic Workflows & OpenCode — Midudev

Web Development with AI (Streaming & Integrations) — Midudev

Introduction to AI for Developers (MCPs & LLM Fundamentals) — Midudev

Building AI Agents for Beginners — Microsoft Learn

LANGUAGES

Spanish: Native

English: Upper Intermediate – B2
