Professional Profile

Fullstack Developer with a strong background in software development and Systems Engineering. Proven experience building **production-ready web applications for real clients**, focused on **process automation, operational efficiency, and scalable digital solutions** for small and medium-sized businesses. Solid command of the modern JavaScript ecosystem, relational and non-relational databases, and fullstack architectures. Strong problem-solving mindset and product-oriented thinking.

Education

- Information Systems Engineering – UTN FRT – San Miguel de Tucumán (In progress)

- Higher Technical Degree in Programming – UTN FRT – San Miguel de Tucumán (Graduated)

Technical Skills

- Languages: JavaScript, TypeScript, HTML5, CSS3, C#, SQL, Python

- Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Firebase Firestore

- Frameworks & Libraries: React, Next.js, Node.js, Express, Tailwind CSS, Prisma, .NET

- Tools & Development Environments: Git, GitHub, Firebase, Visual Studio Code, Visual Studio, REST Client (Postman/Thunder), Scrum, UML

Languages

- Spanish - Native

- English - Upper Intermediate (B2)

Soft Skills

- Strong problem-solving skills

- Effective communication with both technical and non-technical stakeholders

- Collaborative teamwork in agile environments

- Adaptability and continuous learning

- Attention to detail and user experience focus

- Efficient time and priority management

Highlighted Projects

Consorcio-App – Property & Condominium Management System

Web-based management system for condominium administrators, covering buildings, units, monthly fees, payment tracking, partial payments, debt management, and resident records.
Stack: Next.js, TypeScript, Prisma, PostgreSQL (Supabase), Tailwind CSS
Business Impact:

- Reduced administrative workload by ~60%
- Improved financial control and transparency
- Minimized billing and payment tracking errors
  🔗 GitHub: https://github.com/tomasvarela21/Consorcio-app

Alenort – Distribution Management System

Custom web platform developed for a food distribution company to manage inventory, sales, and internal administrative processes.
Stack: Next.js, Tailwind CSS, Firebase Authentication & Firestore
Business Impact:

- Significant reduction in manual administrative tasks
- Real-time visibility of inventory and sales data
- Improved operational efficiency
  🔗 GitHub: https://github.com/tomasvarela21/sistemaAlenort

Chapulina-Tuc – Retail Inventory & Sales System

Management system for a small retail clothing business, focused on stock control, cost vs. price tracking, and sales registration through a simple, mobile-friendly interface.
Stack: React, Next.js, Tailwind CSS, Firebase Firestore
Business Impact:

- Full inventory visibility
- Better profit margin control
- Reduced losses due to stock errors
  🔗 GitHub: https://github.com/tomasvarela21

Oliva.Tuc – Product Catalog & WhatsApp Sales Landing

Responsive landing page with product catalog, shopping cart, and automated WhatsApp checkout flow for a specialty food business.
Stack: Next.js, React, Tailwind CSS, TypeScript
Business Impact:

- Increased customer inquiries and conversions
- Streamlined mobile purchasing experience

FitApp – Fitness & Nutrition Assistant

Fullstack application featuring a chatbot for personalized training and nutrition plans, user progress tracking, and Google authentication.
Stack: React, Node.js, Express, MySQL, Sequelize, OAuth
Business Impact:

- Automated user tracking and personalization
- Improved engagement through tailored recommendations
  🔗 GitHub: https://github.com/tomasvarela21/fitApp

Additional Training

- Python Course – Scientific Computing (FreeCodeCamp)

- Web Development with Astro 5 – Midulive

- Introduction to Microsoft Power Platform – Microsoft Learn
